

Interactions of Matter, Light and Learning*

PHYSICS RESEARCH EXPERIENCES FOR UNDERGRADUATES

Students selected for the program will spend 10 weeks during the summer of 2018 working with research groups in one of the following areas at Kansas State University.

- Ultrafast lasers & attosecond physics
- Nanoparticle formation & light scattering
- Nonlinear fiber optics
- High energy and neutrino physics
- Biological Physics
- Atomic and condensed matter theory
- Physics Education

Dates

May 28 – August 4*

Stipend

\$5,450 stipend, \$750 travel allowance, on-campus room & board*

Eligibility

Only enrolled college students who are US citizens and permanent residents are eligible for NSF funding.

APPLY NOW

www.phys.ksu.edu/reu/apply/

Rolling admissions begin 2/15/18

Pending funding availability

*Contingent on renewal of NSF support
